PROFESSIONAL EXPERIENCE

Certified Clinical Medical Assistant | Tellihealth | Remote | May 2026 – Present

- Provide remote clinical support to patients enrolled in chronic care and Remote Patient Monitoring (RPM) services, supporting consistent communication and continuity of care.
- Monitor patient-reported health information and remote monitoring data within established workflows and escalate concerning findings or patient needs to the appropriate clinical team.
- Communicate with patients by phone and approved remote channels to support engagement, answer routine care-related questions, reinforce care instructions, and encourage completion of monitoring activities.
- Document patient interactions, reported symptoms, monitoring information, outreach attempts, and follow-up actions accurately and promptly in electronic healthcare systems.
- Support patient onboarding and engagement by explaining monitoring processes, reinforcing adherence expectations, and helping patients navigate remote-care workflows.
- Coordinate follow-up communication and identify barriers that may affect patient participation, escalating clinical or operational concerns according to established protocols.
- Protect patient privacy and confidential health information while following HIPAA requirements, organizational policies, and professional standards.
- Collaborate with nurses, providers, care-management staff, and other healthcare team members to support efficient patient care and timely communication.
- Manage multiple patient interactions and priorities while maintaining organized records, accurate documentation, and professional communication.

Patient Care Assistant (PCA) | LTM Home Care | Houston, TX | May 2026 – August 2026

- Provided compassionate, hands-on personal care and daily living support to patients in home-care settings while promoting dignity, independence, comfort, and safety.
- Assisted patients with activities of daily living (ADLs), including bathing, grooming, dressing, toileting, feeding, mobility, positioning, and routine personal-care needs.
- Monitored and reported changes in patients' physical condition, behavior, appetite, mobility, pain, skin condition, and overall well-being to the appropriate supervisor or healthcare team.
- Obtained and documented vital signs and patient observations as directed, recognizing abnormal findings and promptly communicating concerns according to established procedures.
- Assisted with safe transfers, ambulation, repositioning, and use of mobility equipment while following fall-prevention and patient-safety practices.
- Supported meal preparation, hydration, feeding assistance, and basic household tasks related to the patient's care plan and ability to safely remain at home.
- Maintained clean, organized, and sanitary patient-care areas and followed infection-control, hand-hygiene, PPE, and safety procedures.
- Provided companionship and emotional support while using respectful, patient-centered communication with patients, families, caregivers, and members of the care team.
- Maintained accurate care notes and communicated completed tasks, patient needs, and significant observations to support continuity of care.

- Protected patient privacy and confidential health information while maintaining professional boundaries and following organizational policies.

Clinical Medical Assistant Support / Phlebotomist | Loving Choice Pregnancy Center | Houston, TX | June 2024 – August 2025

- Triage patients upon arrival, obtained relevant patient information, and notified providers of patient readiness and abnormal vital signs.
- Documented patient visits, clinical information, and care-related details accurately in the eMDs electronic medical record system.
- Performed blood specimen collection using venipuncture, capillary puncture, and butterfly needles, supporting laboratory testing across pediatric and adult patient populations.
- Assisted providers with clinical procedures and patient care, including splinting, radiology preparation, vaccines, medication administration support, and phlebotomy.
- Prepared, sanitized, and maintained examination and treatment rooms to support infection prevention, patient safety, and efficient clinical workflow.
- Collected laboratory specimens and supported patient follow-up communication regarding results and next steps.
- Provided patient education and responded to post-visit questions with professionalism, empathy, and attention to continuity of care.
- Positioned and prepared patients for radiology procedures while supporting providers and maintaining an organized clinical environment.
- Performed front-office duties including patient registration, insurance verification, telephone communication, payment processing, and administrative support.
- Collaborated with clinical and administrative staff to keep patient flow organized and deliver a positive patient experience.

Clinical Phlebotomy Extern | HCA Northwest Healthcare | Houston, TX | June 2024 – June 2025

- Completed a hospital-based clinical phlebotomy externship, gaining exposure to patient care, clinical workflows, laboratory operations, and healthcare safety practices.
- Performed and strengthened phlebotomy and specimen-collection skills under clinical supervision while following patient identification, safety, and specimen-handling procedures.
- Observed patient intake, bedside communication, interdisciplinary collaboration, and professional standards within a hospital environment.
- Supported healthcare staff under supervision and developed practical knowledge of patient-centered care, clinical professionalism, and hospital operations.
- Adapted to a fast-paced clinical setting while maintaining professionalism, attention to detail, and respectful patient interactions.

ADDITIONAL RELEVANT EXPERIENCE

Family Caregiver — Autism Support | Houston, TX | Ongoing

- Provide ongoing developmental, emotional, and supportive care for two younger siblings on the autism spectrum, including experience supporting a nonverbal child.
- Use individualized communication strategies, structured routines, emotional-regulation techniques, and reinforcement of therapeutic goals.
- Maintain a safe, predictable, and supportive environment tailored to individual developmental and communication needs.
- Demonstrate patience, adaptability, active listening, and careful observation when responding to behavioral or communication needs.

Childcare & Informal Youth Support | Houston, TX | Ongoing

- Provide supervision, structured play, engagement activities, and supportive care for children in family and home environments.
- Develop strong communication, patience, adaptability, and safety-monitoring skills while supporting children of varying ages and developmental backgrounds.
